

AI Training

Analytical approach to train presentation skill with AI technology

A platform to train presentation skill effectively and efficiently with the assistance of AI technology, decision science and applied psychology. It analyses presenters' facial expression, tone-of-voice and body gestures and identifies areas which need improvement.

Application

Staff training | Career and education centres

Improve presentation skills with AI technology

Analysis on facial expression, tone-of-voice, gestures, etc.

Dashboard to show progress and benchmarks

Save time and cost in comparison to traditional F2F training
