

IoT Smart Office

Realising a true smart building with unbeatable 5G technology

Save the hassle of monitoring property conditions by utilising the IoT sensors in your premises to help you collect useful and real-time environment data for precautionary measures. Provide alerts and information on water leakage, flooding and indoor air quality. Indicate utilisation level of consumables like paper towels and toilet rolls for replenishment. Detect idle rooms for energy saving, and more.

Application

Property and facility management | Catering | School campus | Smart toilet

 A member of CK Hutchison Holdings

Monitor indoor air quality, room temperature and humidity

Smart Door with occupancy monitoring

Indicate utilisation level for replenishment

Leakage alert to prevent flooding
