

Robotics

Multi-tasking robots to save manpower and detect important environment data

With the integration of 5G, AI and IoT technologies, Robotic solutions will give a big help in numerous scenarios in different industries, such as concierge at hospitals, dance performance as entertainment at shopping malls, delivery of exercise books at school campus, delivery of food at restaurants, and disinfection at public facilities.

Application

Shopping malls | Chain stores | Schools | Museums | F&B | Public facilities

Navigation and obstacle avoidance

Multi-tasking ability

Robot-as-a-Service (RaaS)

Multi-language support
