

VR Horse Racing

New digital horse racing experience powered by VR technology

Enter a virtual reality world where users can touch, move and explore objects with their hands in a 360-degree virtual environment. Support a heart rate detector to upload health data, to calculate how many calories have been burnt and record workout progress.

Application

Events | Sports centre

360-degree experience

Support heart rate detector

Support multi-players mode

Create own 3D avatars
