

# Immersive Learning with VR

## Combine immersive learning technologies and VR for best learning experience

Students can learn biology, chemistry, physics, mathematics and more from more than 500 VR STEM courses. They can also practise and improve their English-speaking skills with more than 100 daily conversations. Virtual tours allow students to wander around the world, visit famous landmarks and learn about their history, traditions and cultures.

### Application

Schools | Learn at Home | Tutoring Class

Handy and  
easy operation

Monthly update of  
interactive VR content

Provide learning support

Performance analysis and  
evaluation report available
