DIGIBox

Smart Energy Management

Real-time management using mobile app or web portal

Personalise temperature and lighting

Save operating cost and environmental friendly

Increase employees' satisfaction and productivity with better working environment

Create a more comfortable, sustainable and efficient workplace for enterprises

Powered by AI and IoT technologies, this energy management solution helps create a more comfortable and productive workplace by real-time data analysis. Besides, employees can control the lighting and HVAC via mobile app or web portal to achieve immediate comfort. Activity log and insights are also available to optimise energy saving.

Application

Commercial Buildings | Schools | Campus
