5G Smart IoT Sensing System

Air • Humidity • People Flow Sensor

Application

Property Management | School | Office Building | Hotel | Smart Restroom

Functions

Manage air quality and measure the concentration of various air pollutants

Detect water leakage, water seepage and water tank levels

Accurate real-time people counting

Benefits

Dashboard showing accurate real-time data and alerts would be triggered under specific condition

Low cost, small device size, easy installation anywhere

Enable diversified monitoring functions

Lifespan of device battery is up to 3 years

Detect pollutants and finely suspended particulates including:

PM1.0

PM2.5

PM10

Total Volatile Organic Compounds

Formaldehyde
