

Samsung Knox Configure

Device Management

Transforming mobile devices into business machines has never been easier. Samsung Knox Configure supports over-the-air bulk configuration and customization of mobile devices for specific business needs.

Solution Overview

Benefits

- Tailored user experience according to your business needs
- Reduce efforts for bulk device configuration and maintenance
- Simple steps on cloud to transform off-the-shelf devices into purpose-built devices
- Create brand presence on corporate devices by embedding company's logo, animation and wallpapers in the device

Features

- Pre-configure a bulk of devices* and change the configurations by pushing updates** via cloud anytime, anywhere
- Restrict or configure device features according to usage, including app installation, Bluetooth, Wi-Fi, roaming, tethering, USB storage, camera, microphone and even disabling physical keys
- Skip unwanted setup wizard steps and remove unnecessary preloaded apps
- Install and auto-launch your company app and even lock down to kiosk mode to suit assigned usage
- Brand your devices with your company logos, animation, music in booting screen, etc.

* Subject to individual device model support from Samsung

** Available in Knox Configure Dynamic edition
