

Corporate Location-based Service (CLBS)

Mobile Communication

Corporate Location-based Service allows enterprises to monitor and track locations and footprint of vehicles and field workers, providing information that makes operation more effective and serving customers in a timely manner.

Benefits

- Enhance operation and job dispatch efficiency by knowing the location of field workers and vehicles
- Improve customer service by providing timely services and accurate location information
- Save investment with this sim-based solution

Key Features

- Several types of tracking available including real-time tracking, scheduled tracking and vicinity tracking
- Hybrid use of mobile network tracking and GPS tracking to enhance accuracy
- Web console for self-service anytime and anywhere
